Anti-HIV-1 conserved envelope epitope monoclonal antibody, clone V14. Target envelope protein gp120 CD4 binding site of major HIV-1 virus strains

Catalogue number:	ABS004
Lot number:	014051
Concentration:	1 µg/µl
Specificity:	HIV-1 viral envelop protein gp120 CD4 binding site
Host and isotype:	Chimeric monoclonal antibody humanized IgG1
Clone:	V14
Applications:	IF, WB, ELISA, Flow
Format:	Liquid in PBS, pH7.2
Purity:	Affinity purified
Storage:	4 °C for 1 year and -20°C for long-term
Special notice:	This antibody contains code humanization optimized variable domain and human Fc domains . Please use anti-human IgG as secondary antibody , such as Goat Anti-human IgG Fc

Note upon arrival: *briefly centrifuging the vial in a tabletop centrifuge to dislodge any liquid in the container's cap.*

FOR RESEARCH USE ONLY; NOT FOR USE IN DIAGNOSTIC PROCEDURES. NOT FOR HUMAN OR ANIMAL CONSUMPTION
